

A Better World Through Safe and Sustainable Products

In your home. At your workplace.
Our commitment to creating a better world starts with your world – the one that you share with those closest to you every day. From providing safe and sustainable products to conducting our business ethically and responsibly, our priorities begin with meeting the needs and concerns of those who choose to make our products a part of their daily lives.

Let us partner with you today
and develop your complete recycled and
environmentally friendly mat program.

RECYCLING TIRES FOR A BETTER WORLD

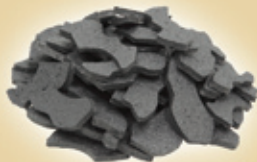

1

TIRE

90,000 lbs. of crumb rubber a day are recycled.

2

CHIPS

Steel belts are removed and tires are cut into chips.

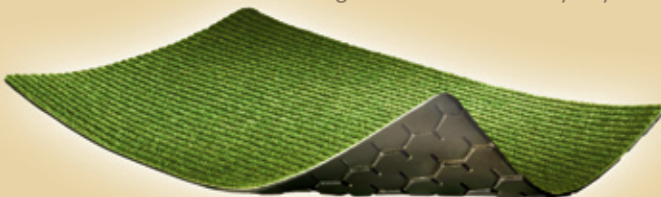

3

CRUMB RUBBER

Tire chips are ground into crumb rubber.

DOORMAT

The rubber is melted and molded into 1,000's of durable designer doormats everyday.

MOHAWK ANNUALLY RECYCLES OVER
18 MILLION POUNDS
OF POST-CONSUMER RUBBER
TIRES INTO WELCOME MATS

THAT'S 84 TIMES
THE NUMBER OF TIRES
ON ALL THE CABS IN CHICAGO
AND OVER 5 TIMES
THE WEIGHT OF THE SEARS TOWER

We lead our industry in recycling old tires, molding them into beautiful, durable designer welcome mats.

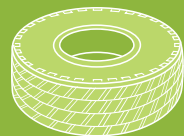

Mohawk began recycling tires in 1999 and is now the leading tire recycler in the flooring industry. In 2004, 10 million pounds of crumb rubber tires — the equivalent of 720,000 tires — were recycled and transformed into designer doormats. Mohawk now converts more than 18 million pounds of tires into doormats each year.

What does tire recycling mean for the environment?

Consider the fact that making four new tires requires 2,072 gallons of water and 88 gallons of crude oil. Discarded tires can also produce dangerous, toxic fires in dumps and old tires retain water where disease-spreading insects thrive.

Recycling post-consumer products — items that have been in the marketplace like used tires and plastic bottles — is a very important part of Mohawk's environmental efforts.

90,000 lbs. of crumb rubber are recycled at the Calhoun, Georgia plant each day.

To learn more about Mohawk's green products and sustainability initiatives, visit www.mohawkgreenworks.com

Each year Mohawk diverts more than **3 billion pounds** of waste from landfills — and the number is growing.
